

10 Great Reasons to Adopt a Black Cat

Did you know that of all the homeless cats out there in the world, black cats are the least likely to get adopted? If you are thinking of adding a kitty to the family, here are some reasons to pick out a black cat!

1. Black is beautiful. Black is not just black; there are as many different kinds of black cats as there are cats! There's the deep, auburn shaded black, the blue black, the black with tiny white highlights here and there etc. Well, you get the picture.
2. You can always find your black cat in the green grass of the yard. Or on your floral bedspread.
3. A black cat is a great accessory to any outfit.
4. Black is very slimming – holding your cat will make you look extra-slim.
5. A black cat will match any decor. You won't have to redecorate your house to coordinate with your cat.
6. Save time on date night – you won't need the lint brush on your little black dress if you have a black cat.
7. Luck, schmuck! Owning a black cat makes you immune to bad luck.
8. Think of your black cat like he or she is an onyx – a rare, glossy, beautiful precious stone. Show off your rare, fuzzy "bling" to your friends.
9. Love knows no colour! Black, white, brown, calico, tabby... your cat is going to love you just the same.
10. Your cat doesn't care what colour YOUR hair is!
